## **Voice over IP for Symbian UIQ Smartphones**

**Professional VoIP client Optimobile Uniphone for UIQ3  
now available at [symbiangear.com](http://symbiangear.com)**

**MUNICH, Oct. 11th 2007** - Motricity Germany and Optimobile AB announce the availability of Optimobile's VoIP client software UniPhone through SymbianGear.com. Individuals, small-to-medium enterprises and others can now enjoy low cost, or even free mobile voice calls by the use of the client software that makes it possible to call using regular phone numbers over the Internet with your Symbian UIQ Smartphone. UniPhone follows the SIP-standard and uses the WLAN radio interface for wireless calls over broadband. The ability to make Internet telephony calls is subject to that the end-user has access to a WLAN broadband connection and a subscription with a relevant provider of IP-telephony services. The software can be purchased via instant download at 25€.

Optimobile UniPhone is a full featured SIP VoIP client enabling Voice over IP telephony towards SIP infrastructure. UniPhone provides the most convenient user-experience combined with a maximum cost-reduction for mobile calls.

Functions covered by the client software:

- Communicate with other SIP-compatible VoIP applications and systems.
- Call any host by its IP or domain address.
- Call a regular phone using a SIP-PSTN gateway (typically through a VoIP operator or corporate IP-PBX).
- Call a computer or IP-phone in a private network through a SIP proxy.
- Handle multiple calls: put call on hold and switch between two active calls.
- Graphical dial pad to type in numbers and send DTMF signals.
- Multiple views in GUI for P990i flip open/closed and for P1i.
- Support for SIP URL syntax.
- Possibility to call using platform phone Speed Dial settings and to call via UniPhone Dialer, Contacts and Call History
- Selectable flip actions to either no action (off), Answer or Answer/Hangup (P990 with flip)
- Selectable auto-start of UniPhone at phone startup (on/off)
- Selectable UniPhone hot-key enabling (on/off, "Internet" Button only)
- Noise reduction settings (low, medium, low). Sensitivity before sound handling interprets noise as "speech".
- Emergency call handling, preference to cellular networks whenever possible and fallback to VoIP when failing on cellular network.
- Excellent sound quality with Acoustic Echo Suppression, Noise Suppression, Automatic Gain Control, High-Pass Filter, Voice Activity Detection, Discontinuous Transmission, Comfort Noise Generation. High packet loss robustness.

The Optimobile UniPhone client is currently is available for SonyEricsson's Symbian UIQ 3 platform. Further platforms such as Windows Mobile are supported and may be available in the future via Motricity's worldwide online portals. The software is available through the online-portal [www.symbiangear.com](http://www.symbiangear.com), where it can be purchased via download at a price of 25€.

**About Optimobile:**

OptiMobile offers a completely unified mobile voice solution – WBX. OptiMobile's customers include mobile system providers, global operators, providers of enterprise communication solutions and terminal manufacturers and vendors. End-users are able to use WLAN equipped mobile phones for calls over the Internet via WLAN whenever a WLAN Internet access point is within reach. Calls are automatically and seamlessly transferred between Internet and cellular networks. OptiMobile is a leader within the field of seamless convergence between wireless Internet telephony (VoIP) and cellular telephony. Supported by OptiMobile's WBX solution operators and providers of enterprise communication solutions are able to offer end-users completely unified services, independent of the networks and radio access technologies being used from time to time. End-users benefit from lower cost of calls, reduced complexity due to unified call handling, higher availability and increased productivity. In general, calls made using VoIP have better sound quality than cellular calls. OptiMobile is licensing voice processing software for VoIP from Global IP Solutions. More information is available at [www.optimobile.se](http://www.optimobile.se).

**About Motricity:**

Motricity allows people everywhere to enjoy the independence and productivity of a Mobile Lifestyle — no matter when or where — through the access, delivery and control of mobile content.

At the core of Motricity's managed service solution is the award-winning, carrier-grade Fuel™ 5 Platform. Fuel™ is a comprehensive, modular platform that enables Motricity's customers and content providers to deliver mobile content including ringtones, games and graphics downloads. Motricity's Fuel™ Platform recently received the 2006 GSM Association Award for "Best Service Delivery Platform" and was also named "2005 Premium Mobile Content Platform of the Year" by Frost & Sullivan.

Motricity emerges as the only company with proven and scalable offerings across multiple key mobile content solution categories, including: storefronts, portals, messaging, content aggregation, marketing campaign management and community solutions. By offering these world-class services, Motricity is able to create compelling user experiences and deliver profitable mobile content services to companies seeking to leverage the emerging mobile channel, interact with consumers and build brand loyalty.

In addition, Motricity operates a network of consumer Web sites that offer applications for mobile devices, including: eReader.com, PalmGear.com, Pocketgear.com, Smartphone.net, SymbianGear.com, Symbiangear.de, PalmGear.de, Pocketgear.net and Mobile2day.de, and powers similar web sites for customers such as the Sony Ericsson application shop, the Palm Software Connection and the PalmSource shop.

The company is headquartered in Durham, N.C., with offices in Los Angeles and Munich.
