OptiMobile announces general availability of its Internet telephony client UniPhone for Sony Ericsson P1i and P990i

UniPhone client application available at Sony Ericsson Application Shop

Stockholm, October 8, 2007. OptiMobile, a leading company within the field of seamless convergence between wireless Internet telephony and cellular telephony, today announces that OptiMobile's client software UniPhone for Internet telephony for the Sony Ericsson P1i and P990i is now generally available at the Sony Ericsson Application Shop (<http://applicationshop.sonyericsson.com/>). The client application will also be available for Sony Ericsson W960i.

Individuals, small-to-medium enterprises and others can now enjoy low cost, or even free mobile voice calls by the use of the client software that makes it possible to call using regular phone numbers over the Internet with your Sony Ericsson P1i, P990i and W960i. The software follows the SIP-standard and uses the WLAN radio interface for wireless calls over broadband. The ability to make Internet telephony calls is subject to that the end-user has access to a WLAN broadband connection and a subscription with a relevant provider of IP-telephony services.

"We have experienced a great demand from the market in this product, also from individuals and small-to-medium enterprises throughout the world" says Lars Edman, CEO of OptiMobile. "The launch of OptiMobile's Internet telephony client UniPhone at the Sony Ericsson Application Shop enables us to reach out and satisfy demand in these customer segments."

About OptiMobile

OptiMobile offers a completely unified mobile voice solution – WBX. OptiMobile's customers include mobile system providers, global operators, providers of enterprise communication solutions and terminal manufacturers and vendors. End-users are able to use WLAN equipped mobile phones for calls over the Internet via WLAN whenever a WLAN Internet access point is within reach. Calls are automatically and seamlessly transferred between Internet and cellular networks. OptiMobile is a leader within the field of seamless convergence between wireless Internet telephony (VoIP) and cellular telephony. Supported by OptiMobile's WBX solution operators and providers of enterprise communication solutions are able to offer end-users completely unified services, independent of the networks and radio access technologies being used from time to time. End-users benefit from lower cost of calls, reduced complexity due to unified call handling, higher availability and increased productivity. In general, calls made using VoIP have better sound quality than cellular calls. OptiMobile is licensing voice processing software for VoIP from Global IP Solutions.
