## **C2Tech distributes OptiMobile's VCC / Dual Mode solution**

(Stockholm, 28 April 2009) C2Tech is licensed to sell and distribute OptiMobile's Dual Mode and VCC products to customers in Turkey.

Enterprises in Turkey are now able to upgrade existing company telephony exchanges with OptiMobile VCC/Dual Mode to achieve a One Phone concept with Voice Call Continuity – all telephony is performed using one mobile phone. When a user is within range of a wireless local area network (WLAN), the call is automatically transferred from mobile (cellular) network to fixed-line network using IP-telephony. The switch between GSM and WLAN can be performed during a call without the user noticing.

*"We see a benefit for our customers using the VCC/Dual Mode solution from OptiMobile, when users are in a WiFi area home or abroad they now have a cost-effective way to make phone calls, using the UniPhone mobile client compatible with all major mobile phone brands," says, Hasan Palaz at C2Tech*

OptiMobile's VCC/Dual Mode solution supports all major mobile phone brands and is compatible with leading IMS platforms and enterprise solutions such as the Aastra technologies MX-ONE enterprise solution and the Cisco Call Manager.

C2Tech and OptiMobile AB have signed a license agreement under which C2Tech will distribute and sell OptiMobile VCC/Dual Mode solution via direct and indirect sales to mobile operators and enterprise customers in Turkey.
