TeleGroup d.o.o. Beograd distributes OptiMobile's Dual Mode solution

(Stockholm, 1 April 2009) TeleGroup d.o.o. Beograd is licensed to sell and distribute OptiMobile's Dual Mode product to enterprise customers in Serbia and in the western Balkans.

Enterprises in Serbia and the western Balkans are now able to upgrade existing company telephony exchanges with OptiMobile Dual Mode to achieve a One Phone concept – all telephony is performed using one mobile phone. When an employee is within range of a wireless local area network (WLAN), the call is automatically transferred from mobile (cellular) network to fixed-line network using IP-telephony. The switch between GSM and WLAN can be performed seamless during a call, without the user noticing.

"We see a large potential amongst our customers for the Dual Mode solution when Enterprises are merging the different phone solution available, into one phone, with VCC from OptiMobile", says Diana Gligorijević, Marketing Director of TeleGroup Company.

OptiMobile Dual Mode supports all major mobile phone brands and is compatible with leading enterprise solutions such as the Aastra technologies MX-ONE enterprise solution and the Cisco Call Manager.

TeleGroup d.o.o. and OptiMobile AB have signed a license agreement under which TeleGroup d.o.o. will distribute and sell OptiMobile Dual Mode via direct and indirect sales to enterprise customers in Serbia and the western Balkan countries.
